## **ESTABLISHMENT OF MILITARY TRAINING MANAGEMENT IN THE COSSACK-HETMAN STATE**

**Problem statement.** *Today, Ukraine is in a state of hybrid war, which is being waged against it by the Russian Federation. In such circumstances, the need to improve the quality of training of military specialists, who must perform their duties effectively, is greatly enhanced. An important element in solving this problem is to improve the system of public administration of military education, which should ensure the combat effectiveness of the Ukrainian army. Given the complexity of this problem, it is advisable to refer to the experience gained during the existence of the Ukrainian Cossacks, who managed to create a fairly effective system of military education management based on national traditions.*

**Presentation of the main material of the study.** *The article considers the formation of the management of military education in the Cossack-Hetman state. It is shown that the basis of military education was the Cossack-knightly traditions, the ideas of patriotic education of youth, which were based on the principles of military skill, heroism and the idea of Ukrainian statehood. It was established that the management of the military education was entrusted to the leadership of the Cossack army, and the main functions were performed by the military osavul, who had an assistant. Considerable attention to military training was paid to physical and military exercises, as well as religious education.*

**Conclusions and prospects for further research.** *Summing up the study it is necessary to indicate:*

*1. During the existence of the Cossack-Hetman state there was a system of management of Cossack military education, which included physical and military education, as well as personal development based on love for the native land, native land in order to form a Cossack-knight with a strong Ukrainian national consciousness.*

*2. The process of military training of Cossacks included 5 areas related to tactics: 1) preparation of young Cossacks for sword fighting, the ability to shoot with rifles, pistols and guns; 2) the order of infantry fire; 3) horse lava offensive; 4) battle by separate detachments; 5) use of a mobile camp.*

*3. The process of leading military education was entrusted to senior officials of the Cossack state, and the solution of specific issues was the task of the military osavul and his assistants.*

**Key words:** *management of military education; Cossack-Hetman states; military training; military osavul; Ukrainian Cossacks; national consciousness; religious education.*
